

2 Months Intensive Training in

 Dart +  Flutter with

{dev}labz
// hack your career

Flutter is a free and open-source mobile UI framework created and released in 2017 by Google. It has quickly gained following as it allows developers to use one language and codebase to create apps for multiple platforms like iOS and Android.

Flutter is a modern framework, and you can feel it! It's way simpler to create apps with it. With mobile devices becoming more and more popular, flutter followers have grown rapidly over the last few years.

Flutter is well-documented and has a very robust community. Apart from mobile apps Flutter is now expanding into desktop apps and embedded technologies. It's preferred by both startups and well established organizations due to it's scalability.

Flutter consists of an SDK and a framework that includes an UI library of elements and widgets. The programming language used is Dart. It focuses on front-end development, and is built to easily create a wide range of cross-platform apps for any screen.

Developers on this framework are known to popularly use Firebase for hosted backend services such as a realtime database, cloud storage, authentication, and hosting among other things.

Why {dev}labz ?

Devlabz is Not another Training Institute. We provide an actual Work Environment for you to experience and learn the dynamics of a real company. We'll be your co-workers and mentors, not teachers. And we work on real projects with industry relevant stacks and techs.

```
// Container
), // Scaffold
); // DecoratedBox
}

Widget inputEmail() {
  return Container(
    decoration: BoxDecoration(
      borderRadius: BorderRadius.circular(30),
      border: Border.all(color: Colors.white),
    ), // BoxDecoration
    child: TextField(
      decoration: InputDecoration(
        border: InputBorder.none,
        contentPadding: EdgeInsets.symmetric(
          vertical: 10,
          horizontal: 10,
        ),
      ),
    ),
  );
}
```

Fresher to Pro in Just 2 Months!

Our programs are practical and focuses on building the right skills and attitude.

WORK, LEARN

The best way to learn is when you do stuff hands-on. Which is why we don't teach. We work on projects in teams so you can learn from your colleagues, mentors and from the wider online community. You'll be ready to adapt and work in every kind of environment out there.

WHAT SETS US APART

- » Real Work Environment
- » Work on Live Projects
- » On the Job Learning Methods
- » Using Latest Stacks & Tools
- » Individualised Mentoring
- » Career Guidance & Support
